

Advancing Data Literacy Across State Government

Josh Martin, Founder, Martin Innovation Data and AI Solutions, LLC; Former Indiana Chief Data Officer

The Data Literacy Gap: A Shared Challenge

- ★ Inconsistent data definitions and standards across entities.
- ★ Lack of training and resources for data analysis.
- ★ Difficulty communicating complex data to non-technical audiences.
- ★ Siloed data hindering collaboration and strategic decision-making.

Bridging the Gap: Collaboration & Communication

- ★ Establish an organization wide data governance council or similar body.
- ★ Invest in comprehensive data literacy training programs.
- ★ Develop standardized data definitions and protocols across organizations.
- ★ Utilize data visualization tools to communicate complex information.

Empowering Agencies Through Data-Driven Decision Making

- ★ Indiana Drug Epidemic Response
- ★ Data Literacy Program
- ★ Elimination of menial work opening time to focus on more important and impactful work. ISP Forensic Lab Reports.

Building a Data-Driven Future

- ★ Start by identifying key data challenges within your organization.
- ★ Explore resources and best practices to enhance data literacy.
- ★ Foster collaboration between entities.
